

Giorgi Imerlishvili

Ph.D. in Mathematics | Data Analyst / Data Scientist

Tbilisi, Georgia

☎ +995 598 838218 ✉ imerlishvili18@gmail.com 🌐 gimerlishvili 🌐 imerla

Professional Summary

Data Analyst / Data Scientist with a Ph.D. in Mathematics and 3+ years of programming experience. Strong background in data analytics, machine learning, and statistical modelling using Python and SQL. Experienced in building end-to-end data workflows, predictive models, and interactive dashboards that translate complex data into actionable insights.

Technical Skills

Languages: Python · SQL · JavaScript · LaTeX

Machine Learning & Data: scikit-learn · pandas · NumPy · matplotlib · seaborn

Databases: MySQL · mysql-connector · tabulate · file I/O

Visualization & BI: PowerBI · dashboards · reporting · data storytelling

Workflow & Tools: Git · GitHub · VS Code · Jupyter Notebook · Cursor

Miscellaneous Projects

Credit Card Fraud Detection Dashboard (Python + Power BI) – End-to-end analytics and fraud detection system:

- Processed and cleaned financial transaction data and built a Random Forest model
- Designed an interactive Power BI dashboard with KPIs, fraud trends, and risk profiles for actionable fraud prevention insights

Salary Predictor (Python + ML + CLI) – Modular machine learning pipeline for salary classification and regression:

- Trained and compared 18+ ML models, achieving high prediction accuracy for salary classification and regression
- Automated visualization of salary trends, highlighting key factors influencing compensation across company sizes and experience
- Built an interactive CLI for real-time salary predictions, streamlining analysis workflow

Car Price Prediction (Python + ML) – Regression-based car price analyzer:

- Conducted data preprocessing and feature engineering
- Built regression models (Linear, Ridge, SVR, etc.) and visualizations for feature impact, correlation, and price distribution

Employee Management System (Python + MySQL) – Terminal-based CRUD system:

- Managed employee data (add, update, delete, search, promote) for a database of X+ records
- Exported database schema, views, and stored procedures, improving reporting efficiency
- Console-based UI with tabulated output, reducing manual data handling time

Responsive Banking Dashboard (HTML + CSS + JavaScript) – Dual-page app with dashboard and transaction history:

- Tracks income/expenses and provides category-based insights
- Interactive filters and charts for real-time spending analytics

Virtual Library System (JavaScript + Node.js) – Console-driven book lending and recommendation engine:

- Borrow/return flow with due dates and penalties
- Book recommendations based on borrowing patterns, with analytics for top-rated and most borrowed books
- Search and filter features

Space Shooter Game (JavaScript + Canvas API) – 2D browser-based arcade game:

- Implemented player/enemy movement, collision detection, scoring, and boss mechanics

Education

Georgian Technical University	
<i>Ph.D. in Mathematics</i>	<i>2019 – 2023</i>
Georgian Technical University	
<i>M.Sc. in Applied Mathematics</i>	<i>2017 – 2019</i>
Ivane Javakhishvili Tbilisi State University	
<i>B.Sc. in Mathematics</i>	<i>2013 – 2017</i>

Courses

Skillwill – Frontend Development	<i>2025 – Present</i>
Stanford University's Code in Place – Programming Course in the Python Programming Language	<i>2024</i>
F1 IT Academy – IT Specialist	<i>2015 – 2016</i>

Working Experience

A. Razmadze Mathematical Institute of TSU	
<i>Researcher</i>	<i>07/2022 – Present</i>
International Black Sea University	
<i>Invited Professor</i>	<i>02/2023 – 07/2023</i>
Georgian Technical University	
<i>Invited Professor</i>	<i>02/2023 – 07/2023</i>
Kutaisi International University	
<i>Professor's Assistant</i>	<i>10/2020 – 07/2023</i>
San Diego State University Georgia	
<i>Teaching Assistant</i>	<i>01/2019 – 05/2021</i>

Languages

Georgian: Native or Bilingual
English: Fluent (C1)
Russian: Upper-intermediate (B2)

Interests

Data visualisation, Machine learning applications, Applied mathematics, Financial analytics, Open-source projects
